PRESS RELEASE

Urban Tech 2026 - The Urban Technology Show, a Major Exhibition Hub

The event takes place at BolognaFiere from 7 to 8 October 2026

Bologna, 7 October 2026 – **Urban Tech 2026 – The Urban Technology Show**, the new event dedicated to **e-mobility, traffic, commuting, security, telecoms & data, and the environment**, opens on **Wednesday, October 7**, at **BolognaFiere**, and runs **through Friday, October 9**. It is Europe's first exhibition hub dedicated to the intelligent management of cities, urban agglomerations, urban communities and territories, addressing and finding solutions for mobility, traffic, commuting, infrastructure, security, innovation, digitalisation, telecommunications, connectivity, resources, energy, sustainability and the environment.

Urban Tech 2026 comprises several international exhibitions and conferences, including **E-Tech Europe 2026** (advanced batteries and innovative technologies for the production and recycling of electric and hybrid vehicles for the automotive, transport and industrial sectors); **E-Charge 2026** (the EV charging industry and market, charging points and stations, technologies and services); **Traffic 2026** (traffic management, safety and enforcement, smart roads and smart cities, intelligent mobility, parking solutions, public and collective transport); and **Wireless & Towers 2026** (transmission towers, strategic infrastructure, technologies and equipment for telecommunications, broadcasting, satcom, security, smart cities and territorial applications).

The event brings together **208 exhibitors** from **12 countries**: China, France, Germany, Hong Kong, Ireland, Israel, Italy, the Czech Republic, the Netherlands, the United States, Switzerland and Taiwan.

The conference programme is extensive and highly specialised. Over the three days, topics will include the challenges facing wireless communications and their infrastructure; the Italian supply chain for equipment and systems for energy storage; the *Stati Generali della Ricarica* (General States of EV Charging); innovation in electric vehicles; new solutions for zero-emission urban transport; and artificial intelligence to support urban decision-making. A special event scheduled for **Thursday, October 8** is **Battery Day**, the second edition of the conference-event dedicated to the battery industry, organised in collaboration with **Battery Industry**, the world's leading industry
